

# 30 days. One ops surface. \$3,500 flat.

2 slots — then the offer closes. We run it in production, document it, hand you a written + video case study on day 30.

50% DAY 1 · 50% DAY 30 · WIRE OR USDC

## Pick one surface

- Treasury recon** — daily reconciliation across wallets, CEX, multisig. End-of-month close in hours.
- Discord triage** — 24/7 first-line support. Your mods get their weekends back.
- Weekly metrics roll-up** — Monday morning report, pulled from your stack, written narrative, shipped automatically.
- Contributor onboarding** — new hires → productive in 48 hours. Access, docs, first task, week-1 check-in.

## Timeline

DAY 1	Kickoff, access, success metrics agreed
DAY 2-5	Build
DAY 6	First production run
DAY 7-28	We run it live, daily updates
DAY 29	Handoff doc + runbook
DAY 30	Written + video case study delivered

## The trade (why it's \$3,500, not \$10k+)

- Named logo usage on our site + decks
- Case study with named quote (written + 2-min video) — editorial veto on every word

Below-retainer pricing in exchange for durable proof assets we can use. If you won't be named, our retainer product is a better fit.

## Who this is for

Web3 teams, 10–40 people, post-launch. One specific ops pain you can name in 30 seconds. Async-first. Comfortable moving fast.

## Who this is not for

Teams who need to “explore options,” teams who want two surfaces, teams who won't be named in a case study.

## The math

Retainer for one surface	~\$10,000+/mo
Pilot pricing	\$3,500 flat
Commit	30 days, no auto-renew
Savings	~\$6,500+ month-1
Cost to you	logo + 45 min on-camera

## How to apply

- Fill out the intake form (4 min) — **GHOSTWORK.AGENCY/GHOST-OPS-PILOT**
- 15-min intake call within 24h
- Match → kickoff within 5 business days
